Location: Each about 30mins drive from Batam Centre ferry terminal.

Organization's Activities: They takes in orphaned children and provides them with lodging, clothes, food, shelter and education. Most importantly providing these underprivileged children with a proper living environment for positive upbringing.

MISSION REPORT

3. **REASON FOR MISSION:**

We have previously tried to extend our social works into Indonesia, starting off with in Batam about 2 years ago but failed due to communication problems with the locals. Now with the help of 2 of our new members with relatives there and thus are familiar with the region, the time is ripe for us to go on this mission as it is always been known that there are indeed many needy that we can help assist there. This maiden mission will also serve as a fact finding and familiarization trip to strengthen and extend our work there.

4. **MISSION SUMMARY:** (what was done, the response, observations etc.)

On 11th Oct 14, SWAN FUND representatives, Ramli, Nurhafifah, Glyen and Anne Ong, set off from Singapore with about 20kg of preloved toys, 100sets of colour pencils and dozens of pens, to Batam, Indonesia.

After checking into a nearby hotel for a quick freshen-up, they immediately went to KFC at Batam Centre and prepared 40sets of Kid's Meal to be brought for the children in the orphanage of Panti Asuhan Qurrotu A'Yun.

Reaching the orphanage at about 1500hrs local time, they were greeted by the children who slowly assembled in the living room of the building. And after a brief introduction by their care takers and themselves, the food, toys, colour pencil sets and pens were distributed to each of the children. The face of the children brightens up upon receiving these and they started eating and playing with each other with their newly received toys. They mingled with the children, chatted with them and embraced them dearly. After about 2 hours there, it was time to leave. The children did their traditional farewell greetings to everyone in the team and after some parting photo shots, they left and retire for the day.

The next day on the 12th Oct 14, after checking out of their hotel, they left for another KFC nearer to the 2nd orphanage to be visited and another 35sets of Kid's Meals was prepared. With this and their balanced preloved toys, colour pencils and pens, they reach Panti Asuhan Al-Ikhlas at about 1500hrs local time. After the children assembled, they greeted each of them who reciprocated with their traditional greetings to each of them. Shortly after some introductions by Ustaz Zulkifli and them, the distribution of the rations began.

MISSION REPORT

As the mood of the children liven up, some performed poem recitation and sang traditional songs as appreciation to the team.

After spending about 2 ½ hrs with the children, again its time to leave. The residences gathered with them, took some parting group photos, and they bided farewell to the team who then left for their dinner before taking the next earliest ferry back to Singapore.

As with all our missions, all traveling expenses on this mission for transportation, lodging, food, etc. are borne individually by our representatives.

5. LESSONS LEARNT: (IF ANY): For future improvements

Some of the stuff toys in the form of animals were not suitable in such community. This was not thought off until during preparing stocks in the hotels to be brought 1st orphanage. This resulted in loosing some numbers of stuffed toys which could otherwise be given to the children. Future mission would thus have to consider the suitability of such toys before they are brought on locations. Indeed a valuable lesson learnt.

6. THOUGHTS OF THE DAY:

Being our 1st mission to a community of a different faith and believes, it truly exemplifies that we are indeed a non-sectarian charitable society. That we will go anywhere to anyone who we can help, While achieving our primary objective of bringing warmth to the needy, we are also able to experience the different lifestyles and practices of a different faith while feeling and experiencing the same love towards each other.

Indeed living within the family of mother Earth, our love towards all brothers and sisters would be one that is universal and all encompassing regardless of any cultural, traditions, faith, believes and lifestyles difference of each other.
